From OER Adoption to Course Redesign

Building Structure That Scales

Erica Huff, Associate Librarian

Midlands Technical College

OpenEd26 · October 28, 2026

MIDLANDS TECHNICAL COLLEGE

Today’s Focus

1. **Faculty support**: alignment, accessibility, course coherence

2. **Milestones**: accountability and faculty autonomy

3. **Course design** and student experience indicators

4. **Scaling individual OER** use into coordinated course redesign

MTC's OER Program: The Context for Redesign

94 fully deployed or in pilot

96 OER courses: 77 fully deployed • 17 pilot • 2 in development

27,072 OER course enrollments

$4.03M estimated avoided textbook costs

2025–26 academic year • Fall 2025 + Spring 2026 + Summer 2026

Full-rollout courses only; pilot-only use excluded. Costs include $100 defaults.

An Established Program, Evolving Support

Library support

Faculty-by-faculty OER assistance

A coordinated FLC

Academic leadership, library staff, and course-development colleagues established the FLC

2025 onward

Facilitated both cohorts; used faculty surveys to adjust support

Summer 2025: 15 courses • One semester was not enough for redesign

2026: 13 courses • Returned to two semesters: spring + summer

Faculty Feedback Shaped 2026

2025 insight	2026 adjustment
Builder role was sometimes unclear	Define scope and handoffs upfront
Guidance needed to arrive earlier	Introduce the review checklist at the start
Workload and pacing varied	Pair milestones with facilitated work sessions
Quality expectations needed visibility	Review one chapter early; refine before completion

Feedback → clearer structure → another round of feedback

Builder—Faculty Partnerships

Shared goal: a usable, aligned, accessible course

Faculty owns instructional decisions	Builder imports and prepares the textbook
Select and verify content Align objectives, activities, and assessment Review accuracy and disciplinary fit Approve or request revisions	Import the selected textbook into D2L Organize chapters and supporting materials Apply templates and accessible formatting Revise within the agreed scope

Librarian facilitation connects resources, licensing guidance, people, and review.

A Structured Course Space

Two semesters. A shared process. Room to revise.

Early spring

Get started

Clarify roles, expectations, and course review criteria.

Spring

Select and align

Evaluate OER and connect materials to course outcomes.

Late spring into summer

Develop together

Faculty lead course design; builders prepare the textbook in D2L.

Late summer

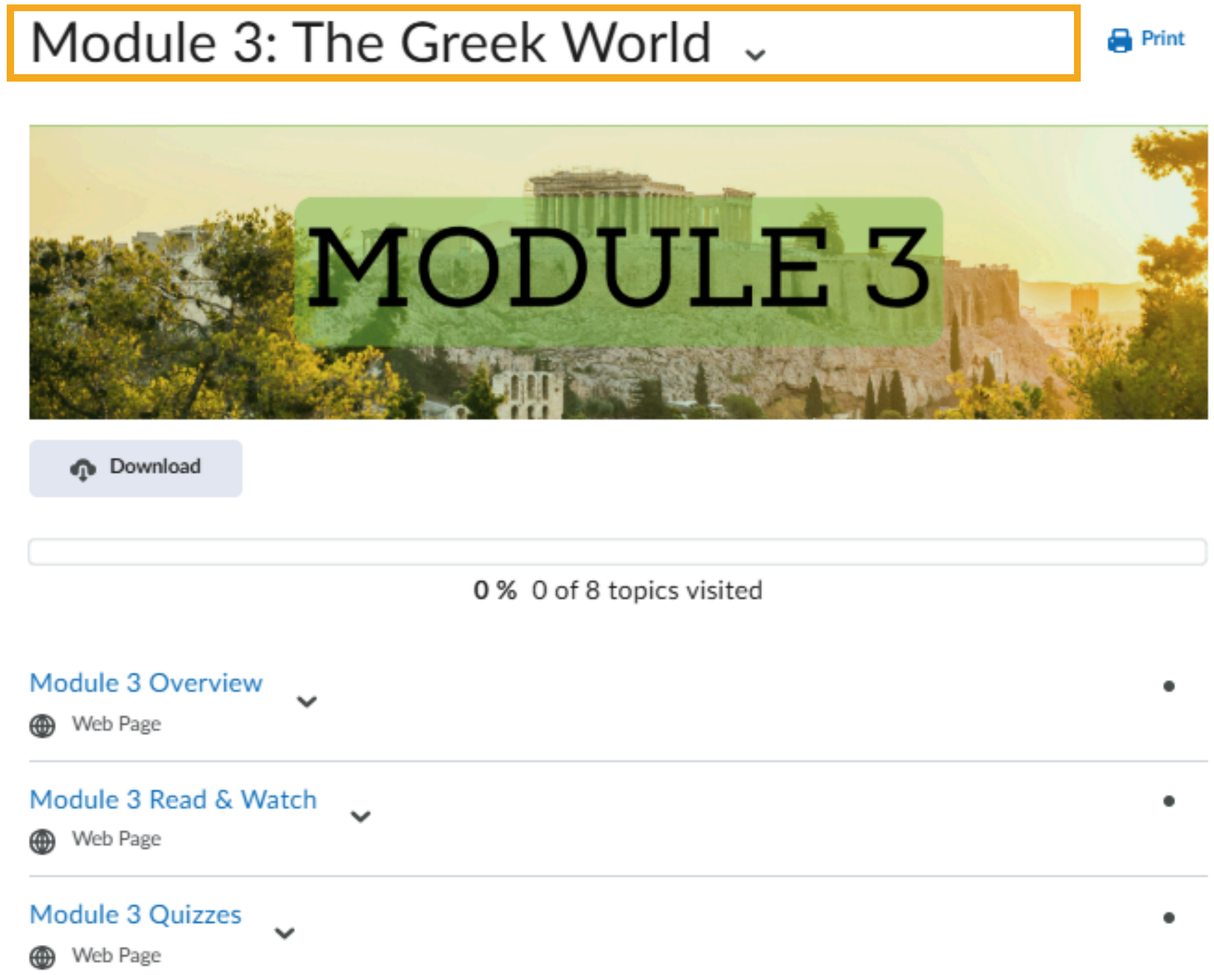

Review and refine

Check alignment, accessibility, and course coherence; revise before teaching.

Shared Criteria for Course Review

SELECTED CHECKLIST CRITERIA

- ☐ **Course organization · 2.3**
  Modules are consistently designed and organized.
- ☐ **Alignment · 4.1**
  Instructional materials support module objectives
- ☐ **Visual appeal · 4.4**
  Course materials are engaging, visually appealing, and inspire trust
- ☐ **Accessibility · 4.6c**
  Written course materials are: accessible

Excerpt: MTC OER Course Review Checklist (2026). Criteria shown without ratings.
Full editable checklist included in session resources.

Milestones Make the Work Visible

An early chapter makes the handoff concrete

 **Builder** Imports and formats one chapter	 **Faculty** Checks fit and accuracy; approves or revises	 **Facilitator** Reviews the approved chapter and next steps	 **Shared checkpoints** Track progress; provide timely support

A useful artifact • a named owner • shared criteria • support for the next step

Current Evidence: Promising, Early

Spring + Summer 2026 • 1,924 valid responses	Agree / strongly agree
Materials easy to access	**93.7%**
Materials easy to use	**92.6%**
Materials support learning	**92.2%**
Materials more engaging	**69.4%**

2026 faculty feedback: 5 of 5 affirmed builder support, role clarity, and milestones.

Small faculty sample; broader student surveys. Perceptions do not establish causation.

1. **Set learning goals**
2. **Align assessments & activities**
3. **Find & evaluate OER**
4. **Organize & Build**
5. **Review & Review**
6. **Teach & Improve**

A Framework Others Can Adapt

- Faculty lead instructional decisions.
- Builders prepare the textbook, format content, and address accessibility.
- Milestones and checklists make expectations visible and guide progress.
- Faculty and student feedback guide continuing revision.

Thank you!
